

Elegant Outdoor Mastery: Stainless Steel Kitchen Collection

Our 316 Marine grade Stainless is the ideal choice for outdoor kitchens. Exposure to moisture and sun would eventually degrade any other material. 316 resists the harsh elements and keeps your faucet in good working conditions. Any Waterstone contemporary or industrial faucets built with 316 will not only beautify your outdoor kitchen area but will be there long after your other outdoor appliances.

Marine grade stainless steel is used on ships for a reason.

All Waterstone Stainless Steel products have a lifetime functional warranty, and the finish is guaranteed forever.
